

PupGrass.

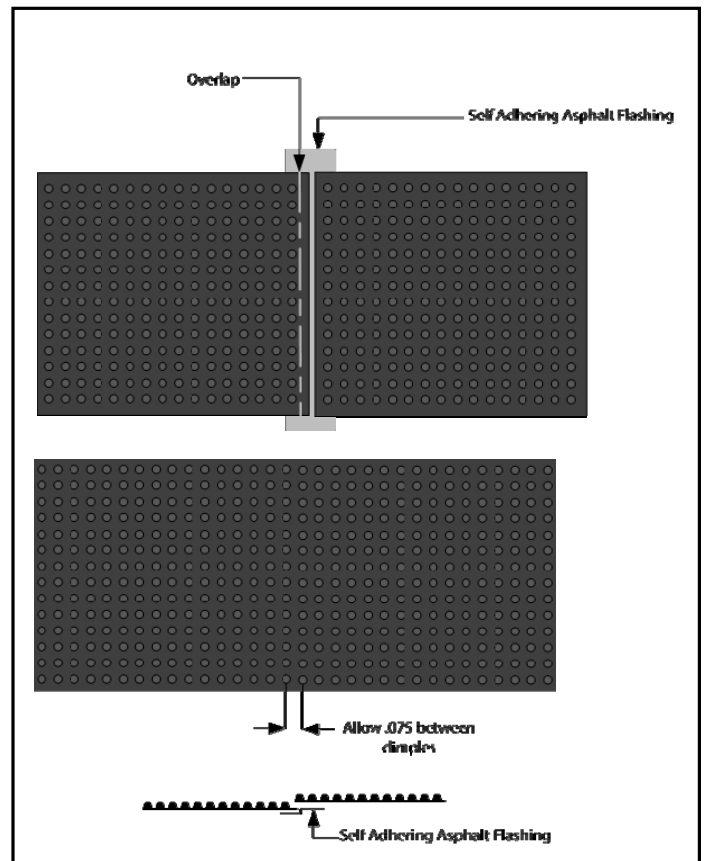

ARTIFICIAL GRASS BUILT FOR DOGS

Installation on Concrete Pup-Grass®-Pup-Drain™-WonderEdge™

WonderEdge-Pup-Drain-Pup-Grass Detail

Pup-Drain Seaming Detail

Notes:

- Use non-perforated Pup-Drain.
- Secure WonderEdge using epoxy glue. Glue every 12" or less.
- Pup-Drain butts up to WonderEdge nailing flange.
- Secure Pup-Drain using glue or asphalt flashing.
- In areas where it is not feasible to nail Pup-Grass:
- Use a waterproof tack strip in space between Pup-Drain and WonderEdge nailing flange and stretch Pup-Grass on to tack strip. Secure with nails or glue.
- Tuck Pup-Grass edges under WonderEdge using a wide putty knife.

Pup-Drain™ is a polymeric sheet designed to allow for optimal drainage of Pup-Grass™ the material is formed to provide high compressive strength. Its impermeable core works well on slabs/Indoor surfaces as it protects urine from being absorbed by porous surfaces like concrete, slate or tile. Pup-Drain creates a void for air flow and keeps synthetic grass away for liquid waste. The dimpled design also creates channel for liquids to travel to drains or soil. Also comes in both perforated and non-perforated styles.
